

CASE 2

Submitted by: Dr. Peter W. Lampert, Armed Forces Institute of Pathology, Washington, D. C.

A 69-year-old man was admitted to the hospital because of a stroke. He had a right hemiplegia, developed bronchopneumonia and died 6 weeks after admission.

At autopsy the heart weighed 300 gms. There was a recent hemorrhage in the left frontal lobe and a separate large hemorrhage in the left parietal lobe.
