

61st ANNUAL DIAGNOSTIC SLIDE SESSION 2020.

CASE 2020-9

Submitted by: Rachel A. Kolster, Jacquelyn Roth, Lea Surrey, MacLean Nasrallah

Clinical History:

A 19 year-old female with no significant past medical history presented to an outside hospital with 3 weeks of headaches that did not respond to medication. Imaging showed a 6 cm right-sided temporal mass involving brain and meninges, of unclear origin.

Material submitted:

2 images of H&E sections showing the temporal mass

Points for discussion:

1. Diagnostic work-up
2. Pathogenesis
