

51st ANNUAL DIAGNOSTIC SLIDE SESSION 2010

CASE 2010-4

Submitted by: Sriram Veneti MD, PhD*, Alexander R. Judkins, MD**, Lucy Rorke-Adams, MD** and Bernd W. Scheithauer, MD***.

* Division of Neuropathology, Department of Pathology and Laboratory Medicine, University of Pennsylvania Medical Center, Philadelphia, PA 19104.

**Division of Neuropathology, Department of Pathology and Laboratory Medicine, Children's Hospital of Philadelphia, University of Pennsylvania School of Medicine, Philadelphia, PA 19104.

***Division of Anatomic Pathology, Mayo Medical Laboratories, Mayo Clinic – Rochester, Rochester, MN 55905.

Clinical history:

2-year-old girl with an 8 cm right temporal lobe intraparenchymal lesion, pressing on but not invading the lateral ventricle.

Material submitted: H&E-stained section.

Points for discussion:

1. Differential diagnosis
2. Immunohistochemistry
3. Prognosis for this lesion
