Indiana University School of Medicine

IU Health Pathology Laboratory

350 W 11th St 6th Floor, 4029-7

Indianapolis, IN 46202

Clinical History: The patient is a 32-year-old female with 1-year-duration of gradual and progressive headaches, cognitive dysfunction (poor concentration and difficulty with memory), fatigue, difficulty with performing daily activities and bilateral blurred vision. MRI was performed and it showed a third ventricular mass.

Material submitted:

- 1- H&E-stained slide
- 2- MRI images

Points for discussion:

1. Discuss the differential diagnosis for this entity.
2. Discuss the appropriate ancillary testing to confirm the diagnosis.
